

We worked to ground the brand into its local soil, transforming a simple site into a high-tech hub for a better, more biodiverse territory

We created a **Biodiversity Oasis** in Sommacampagna (VR), few kilometers away from the AirDolomiti headquarter

There, we:

Planted 100 trees

Installed 2  
Spectrum sensors

# Our Biodiversity Oasis

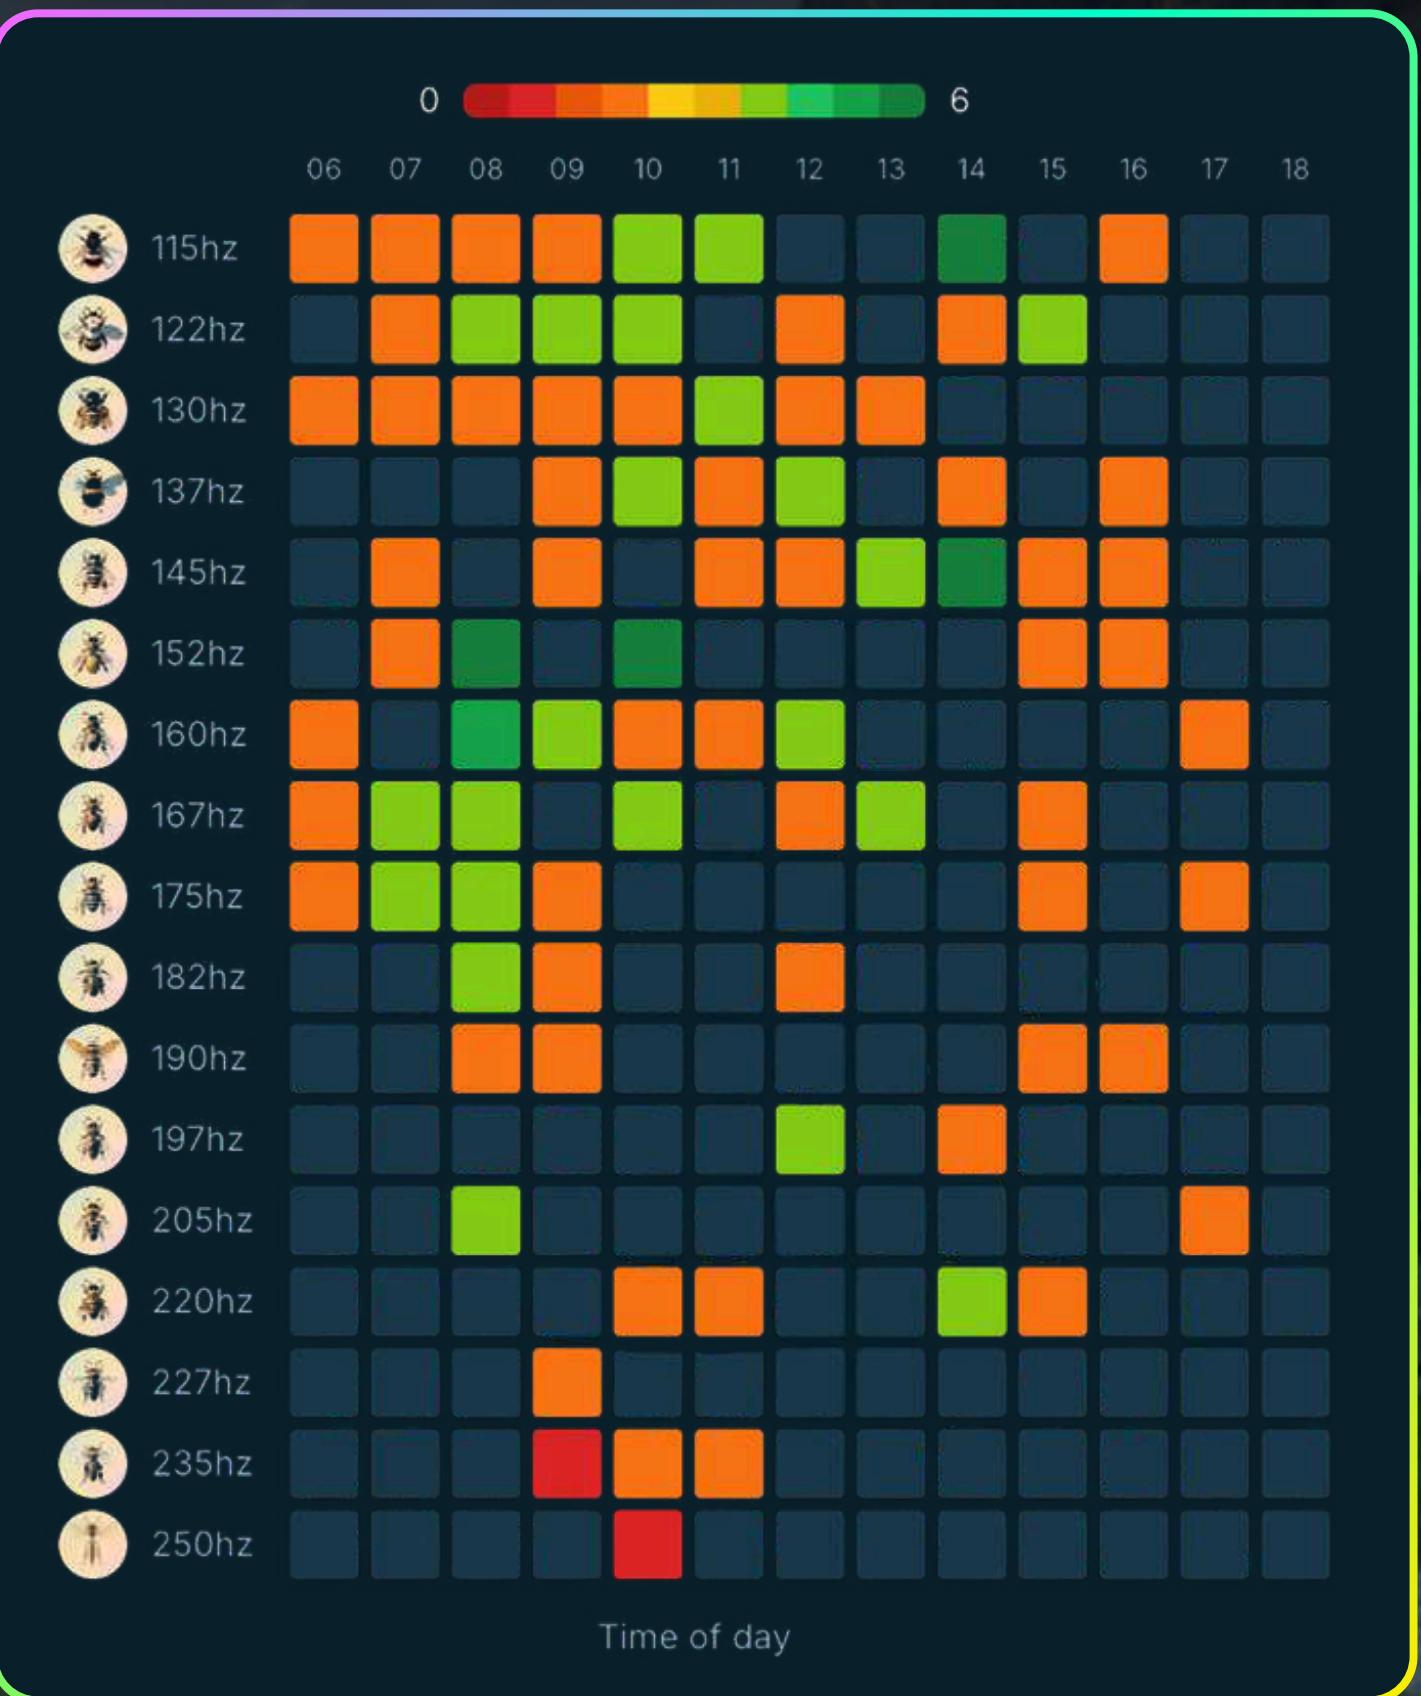

A photograph showing a group of people in a grassy field planting trees. In the foreground, a woman in a white shirt and grey pants is kneeling, focused on her task. Behind her, two women are standing; one is holding a small tree sapling, and the other is bending over, also working on planting. To the right, another person is kneeling, and in the background, more people are scattered across the field. The sky is clear and blue.

We planted the trees **together** with our **tree planting teambuilding** experience

We monitored **227** pollinators,  
all categorized within **17** clusters

In 2026 we'll install  
**2 Hive-Tech sensors**

We shared other informative moments, like the  
***Honey tasting*** and ***Academy*** experiences

With us, you can transform your local landscape into a Biodiversity Oasis and a technological hub for corporate community engagement
