TOYOTA

We transformed the Toyota headquarters into a living ecosystem, where we did more than just planting trees: we created a tech-driven space for a better, more engaged corporate community

We monitored the Toyota
headquarter through
remote sensing
covering a total area of
16 hectares

Biodiversity Monitoring was Performed using IoT Sensors

1 Spectrum

4 Hive-Tech hives

2 PollyX

We directly monitored
240.200 pollinators

Average Temperature

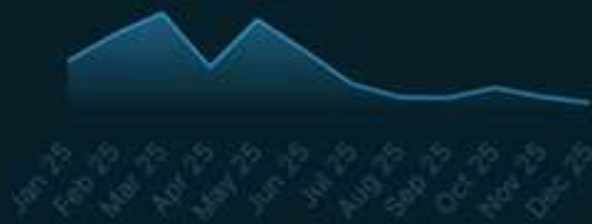

15.1 °C

Average sound intensity

16.9
μPa

Average Humidity

74.1 %

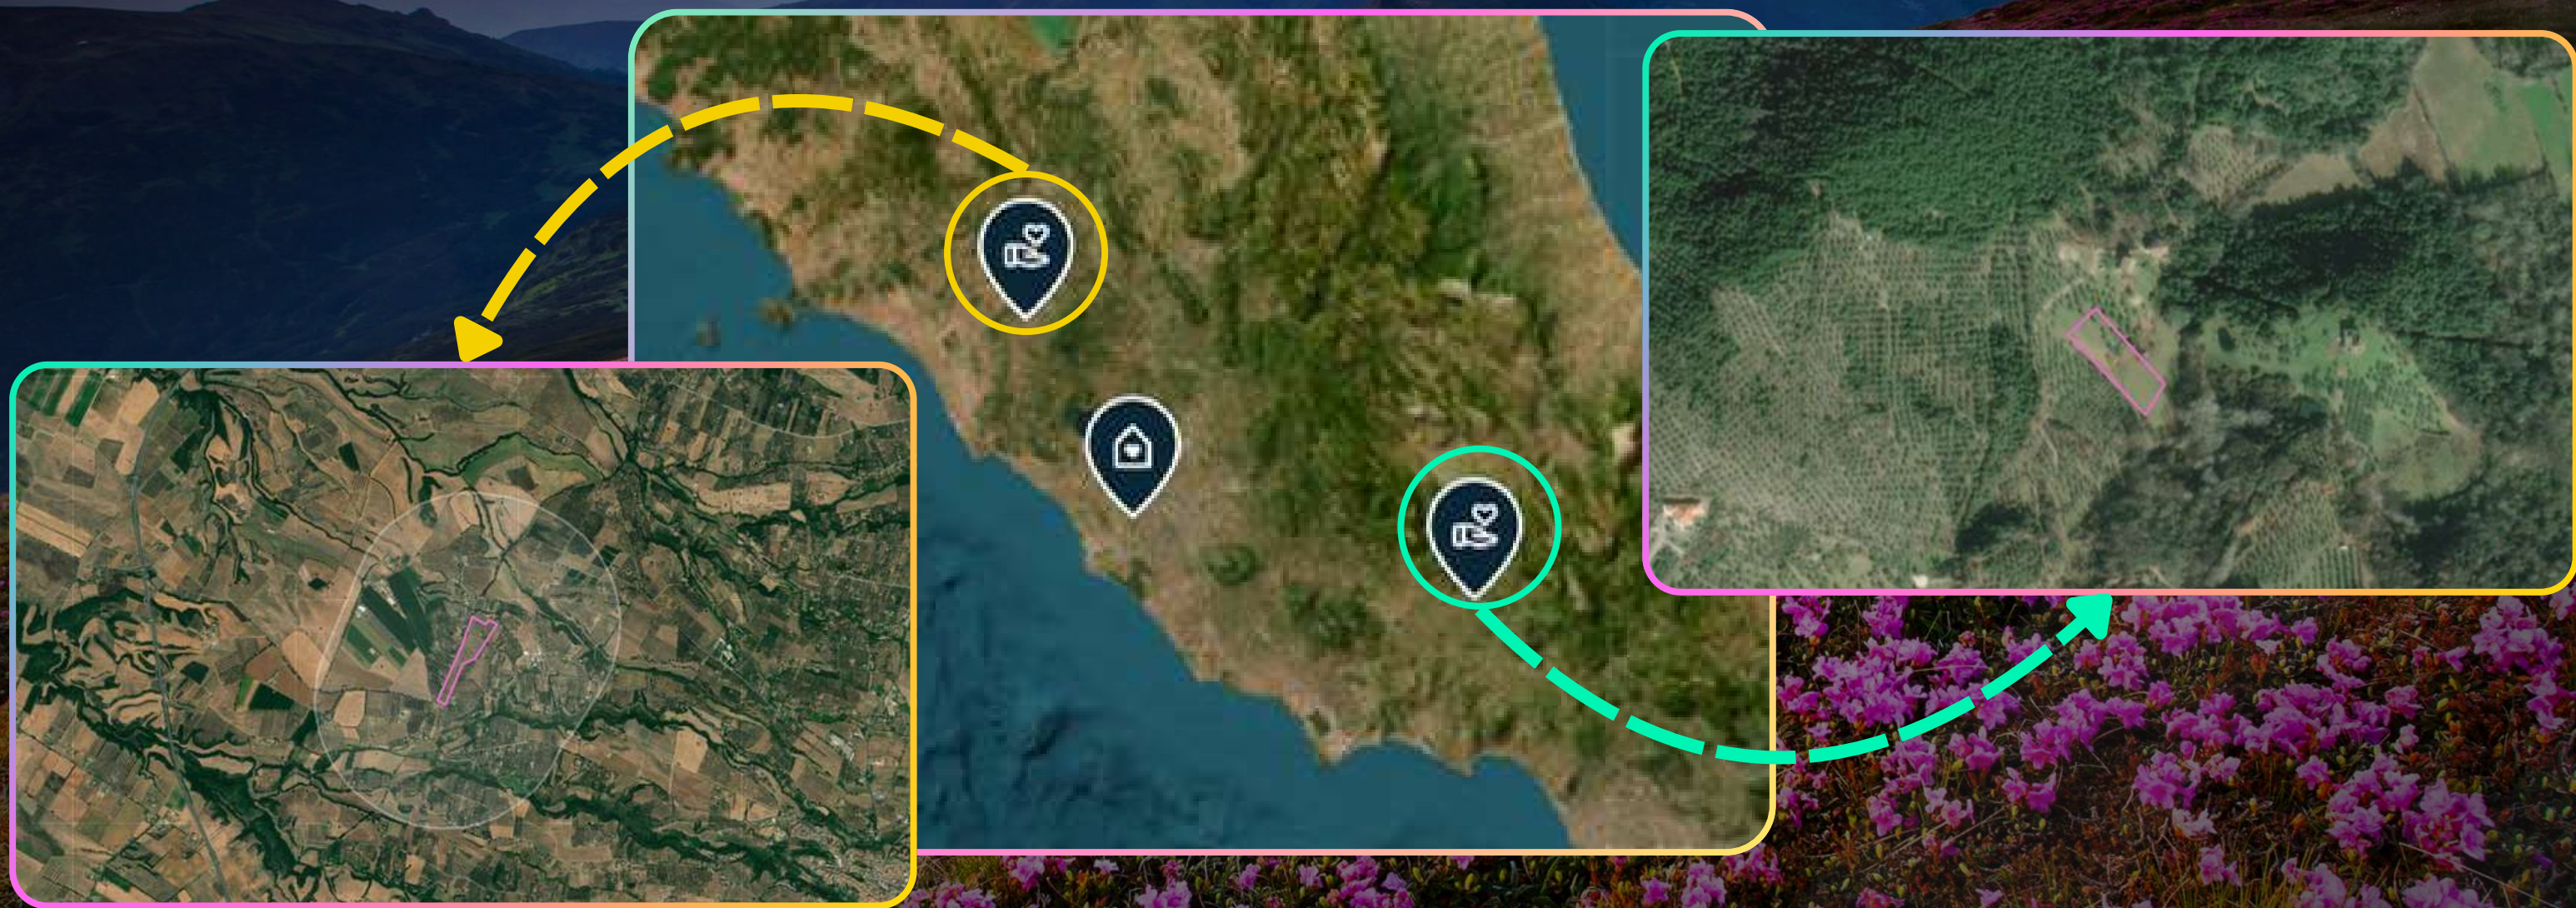

Hive weight

37.4
Kg

We're also monitoring **2 Biodiversity Oases**
With a total of **400 nectariferous trees**

Together, we organized informative events, like the ***Honey tasting*** and ***Academy*** experiences

We worked to turn a corporate workspace into a living ecosystem, creating a better balance where technology and people grow together every day
